Webmaster HTML and CSS for Beginners

Summary
This beginner's course is designed for people who are interested in starting a career as a web designer, or who simply want to build a website for themselves or a company. You will get a thorough introduction to the HTML and CSS web development tools and find out how to build a high-impact landing page, optimised for search engine algorithms and responsive to browser screen sizes. During the course, you will also build your own store front, using animation, transition, and transformation techniques to attract visitors.
